from histories (Interurban Specials 16, 18, 20 & 23, Pacific Electric Stations ERHA). (date)G = USA Official Guide

*Former names: [] Distances in miles. Gauge 4' 8½" unless noted. +(above): main stops only. tm = terminus
Coupled mileages thus: 6.3), stations on the same or substantially the same site. Certain non-passenger locations shown in italics thus: (name). Los Angeles Pacific (LAP), Los Angeles & Redondo (LAR), Los Angeles Interurban (LAI) and Riverside & Arlington (RA) merged with PE September 1911. Sections of LAR transferred to Los Angeles Rly in 1911 are included.*

Note: Hilton & Due classify the whole of the Pacific Electric system as an Interurban Railway. However, many local lines, particularly in the Hollywood and Long Beach areas were street based street car lines, operated with conventional trolley cars. Local Lines in Long Beach, Pasadena & Redlands closed before 1923 are not included in this list (details of stops not known)

++ Reproduction published by Orange Electric Rly Museum, undated with 1908 copyright date which has misled some researchers. The lines included relate to the system about 1923.
